

# TechnoGAS Capability Profile

TechnoGAS

# Our Products

- Bulk Gases
- Industrial Gases
- Medical Gases
- High Purity Gases
- Specialty Gases
- Liquid Helium

# Production Capacity & Capability

- Technogas Plant is supplied, built & commissioned by Linde AG, Germany which is a state of art brand new plant.
- Technogas plant is a fully automated highly efficient air separation unit which stands unique among the peers.
- Technogas is equipped with large storage tanks for storing upto 550 KL of liquids.
- Technogas is also equipped with Tubular Trailers, Liquid Tankers, ISO Tanks with vaporizer where prompt services are provided to the customers across the region.
- Technogas is constantly acquiring assets which are put into use to service the increased need of customers.

# Bulk Gases

## Liquids:

- Liquid Nitrogen supplied in cryogenic tankers
- Liquid Oxygen supplied in cryogenic tankers
- Liquid Argon supplied in cryogenic tankers

## Nitrogen in Tube Trailers & ISO Tanks:

- Gaseous Nitrogen supplied in Tube Trailer
- ISO Tanks with vaporizer for Gaseous Nitrogen

# Industrial Gases supplied in Cylinders

## Welding, Cutting & Shielding Gases

- Industrial grade Oxygen
- Industrial grade Acetylene
- Industrial grade Argon
- Industrial grade Carbon Dioxide
- Industrial grade Nitrogen
- Various Industrial grade mixtures as per client needs
- Industrial grade Helium

# High Purity Gases

- All grade 5 gases (99.999% pure gases)
- All grade 6 gases (99.9999% pure gases)
- Ultra High Purity Distribution systems

# Specialty Gases

We supply complete range of specialty gases which includes:

- Analytical Gases
- Calibration Gases
- Span Gases
- Zero Gases
- Precision mixtures
- All kinds of other mixed gases

TechnoGAS

# Liquid Helium

We supply liquid Helium for various applications with accurate delivery.

Standard Dewar capacities are:

- 400 Liters
- 250 Liters
- 200 Liters
- 100 Liters
- 60 Liters
